mat-cell height not fill parent

Asked 1 year, 6 months ago Active 1 year, 6 months ago Viewed 5k times

I'm using angular mat-table.

4

My problem is that mat-cell height is always 14px (inside content size), but I want to fix the mat-row height:

```
<mat-table #table [dataSource]="dataSource">
```

```
<ng-container matColumnDef="NAME">
```

```
<mat-header-cell fxFlex="100%" class="my-mat-header" *matHeaderCellDef>
  {{ 'NAME' | translate }}
</mat-header-cell>
```

```
<mat-cell fxFlex="100%" class="my-mat-cell" *matCellDef="let element">
  {{ element.name }}
</mat-cell>
```

```
</ng-container>
```

```
<mat-header-row *matHeaderRowDef="displayedColumns" class="my-mat-header-row">
</mat-header-row>
```

```
<mat-row *matRowDef="let row; columns: displayedColumns;" class="my-mat-row">
</mat-row>
```

```
</mat-table>
```

```
.my-mat-row {
  min-height: 100%;
  border-bottom: none;
  padding: 5px 0;
}
```

```
.my-mat-cell {
  color: black;
  cursor: pointer;
}
```

mat-row height is 50px, but mat-cell is only 14px.

how can it fill the parent height?

1 Answer

As MatTable rows are flex container you should use this :

7

```
.my-mat-row {  
  ....  
  align-items: stretch;  
  ....  
}
```

This way all cell will stretch to take full height

perfect! exactly what I need! thanks – [cucuru](#) Mar 12 '18 at 11:42

Thank you so much! I've been bending over backward trying every css hack I know and trying to relearn flexbox and this is exactly what I needed. (RIP the past 3 hours though) – [SleekPanther](#) Aug 23 at 19:36
