Hello friends I have a code that show a processing image, but I don't get that the background change its color, I need to change it to gray color.

```
<body>
<form id="form1" runat="server">
<div>
    <asp:ScriptManager ID="ScriptManager1" runat="server">
    </asp:ScriptManager>
    <script type="text/javascript">
        // Get the instance of PageRequestManager.
        var prm = Sys.WebForms.PageRequestManager.getInstance();
        // Add initializeRequest and endRequest
        prm.add_initializeRequest(prm_initializeRequest);
        prm.add_endRequest(prm_endRequest);

        // Called when async postback begins
        function prm_initializeRequest(sender, args) {
            // get the divImage and set it to visible
            var panelProg = $get('divImage');
            panelProg.style.display = '';
            // reset label text
            var lbl = $get('<%= this.lblText.ClientID %>');
            lbl.innerHTML = '';

            // Disable button that caused a postback
            $get(args._postBackElement.id).disabled = true;
        }

        // Called when async postback ends
        function prm_endRequest(sender, args) {
            // get the divImage and hide it again
            var panelProg = $get('divImage');
            panelProg.style.display = 'none';

            // Enable button that caused a postback
            $get(sender._postBackSettings.sourceElement.id).disabled = false;
        }
    </script>

    <asp:UpdatePanel ID="UpdatePanel1" runat="server">
```

```

<ContentTemplate>
  <asp:Label ID="lblText" runat="server" Text=""></asp:Label>
  <div id="divImage" style="display:none" class="divCentro">
    <div class="FondoGris">
      <asp:Image ID="img1" runat="server" ImageUrl="~/Procesando2.gif"/>
    </div>
    <br />
    <p class="divCentro"><br /><br /><br />Processing...</p>
  </div>
  <br />
  <asp:Button ID="btnInvoke" runat="server" Text="Click"
    onclick="btnInvoke_Click" />
</ContentTemplate>
</asp:UpdatePanel>
</div>
</form>

```

And here is the css code:

```

<style type="text/css">
  .divCentro {
    text-align:center;
    width: 327px; height: 60px; margin-top: -23px; margin-left: -158px; left: 50%;
    top: 40%; position: absolute;
  }
</style>

```

I've tried writing background-color: gray transparent but this only change the color in the div image.

If anyone has any suggestion please help me.

Thanks in advance!

set the background color as black and set the alpha value to 0.4 or 0.5 eg: background-color:rgba(0,0,0,0.5); – practice2perfect Sep 2 '14 at 17:31

but this only change the color in the div - which color do you want to change then? – [LcSalazar](#) Sep 2 '14 at 17:34

## 2 Answers

try this one..

1

```
<div class="divOuterCentro">
  <p class="divCentro"><br /><br /><br />Processing...</p>
</div>
```

CSS:

```
.divOuterCentro{
  height:100%;
  width:100%;
  background-color:rgba(0,0,0,0.4);
  position:absolute;
}
.divCentro {
  text-align:center;
  width: 327px;
  height: 60px;
  margin-top: -23px;
  margin-left: -158px;
  left: 50%;
  top: 40%;
  position: absolute;
}
```

working fiddle.. [link here](#)

To create a semi-transparent background use `rgba()` or `hsla()` functions:

0

```
.divCentro {  
  background-color: rgba(60, 60, 60, 0.5);  
}
```
