CSS :read-only Selector

❮ Previous	CSS Selectors Reference	Next ❯

Example

Select and style only if the input element is "readonly":

```
input:-moz-read-only { /* For Firefox */
  background-color: yellow;
}

input:read-only {
  background-color: yellow;
}
```

Definition and Usage

The `:read-only` selector selects elements which are "readonly".

Form elements with a "readonly" attribute are defined as "readonly".

Version:	CSS3

Browser Support

The numbers in the table specify the first browser version that fully supports the property.

Numbers followed by -webkit- or -moz- specify the first version that worked with a prefix.

Selector					
:read-only	36.0	13.0	3.0 -moz-	9.0	23.0

CSS Syntax

```
:read-only {
    css declarations;
}
```
